OREGON

. . A year's residence at the mouth of lumbia, and various expeditions into the interior, had now given the Astorians some idea of the country. The whole coast is described as remarkably rugged and mountainous with dense forests of hemiork, spruce, white and red ceder, cotton wood, white oak, white and swamp 2sh, willow, and a valuat. There is likewise an undergrowth of arematic shrubs, creepers, and clambering vines, that render the forest seberries, strawberries, raspberries, both red and ellow, very large and finely flavored whortleberries, cranes, serviceberries, blackberries, currants, sloes, and wild

Among the flower vines is one deserving of particular netice. Each flower is composed of six leaves or petals, about three inches in length, of a beautiful crimson, the inside spot-ted with white. Its leaves, of a fine green, are oval and is posed in threes. This plant climbs upon the trees with-at attaching itself to them; when it has reached the topto grow, extends from tree to tree, until its various stalks in-terface the grown like the rigging of a ship. The stems or runks of this vine are tougher and more flexible than the fibres, the Indians manufacture baskets of such

principal quadrupeds that had been seen by the coloats in their various expeditions, were the stag, fallow deer, hart, black and grizzly bear, antelope, absalita or bighore ea and river otter, muskrat, fox, wolf, and panther, the intter extremely rare. The only domestic animal among the

The country abounded with aquatic and land birds, such Patent, or, "Joseph Gillott, warranted," and that each gross bears swans, wild geese, brant, ducks of almost every descripon, pelicans, herons, gulls, snipes, curlews, engles, vultures. ows, ravens, magpies, woodpeckers, pigeons, pheasants ritridges, grouse, and a great variety of singing birds.

There were few reptiles: the only dangerous kind was the itlesnake, and one striped with black, yellow, and whote about four feet long. Among the lizard kind was one about nine or ten inches in longth, exclusive of the tail, and three inches in circumference. The tail was round, and of the same length as the body. The newl was triangular, covered with small scales, green, yellow, black and blue. Each too ad five toes, formshed with strong nails, probably to aid i remarkable fact, characteristic of the country west

the Rocky Mountains, is the mil-ness and equability of limate. That great mountain barrier seems to divide the outlinent into different climates, even in the same degrees of the capricious inequalities of temperature prevalent on the Atlantic side of the mountains, are but little felt on their western declivates. The countries between them and the Pacific are blessed with milder and steasier temperature, resembling the climates of parallel latitudes in Europe. In the plains and valleys but little snow falls throughout the winter, and usually melts while falling. It rarely his the ground more than two days at a time, except on the somits of the mountains. The winters are rainy rather time cold. The rains for five months, from the middle of October to the middle of March, are almost incessant, and often ac companied with tremendous thurder and lightning. The winds prevalent at this season are from the South and South East, which usually bring rain. Those from the North to the South-West are the harbingers of fair weather and a clear sky. The residue of the year, from the middle of March to the middle of October, an interval of seven month serene and delightful. There is scarcely any rain throughout this time, yet the face of the country is kept verding and fresh by nightly dews, and occasionally by humid fogs in the mornings. These are not considered prejudicial to health, since both the natives and the whites sleep in the open at

with period impunity.

While the equable and bland temperature prevails through out the lower country, the peaks and ridges of the vast mountains by which it is dominated, are covered with perpetual snow. This renders them discernible at a great distance skining at times like bright summer clouds, at other times a surning the most aerial tints, and always forming brilliant and striking features in the vast landscape. The mild tempera-ture prevalent throughout the country is attributed by somto the succession of winds from the Pacific ocean, extending from latitude twenty degrees to at least fifty degrees north These temper the heat of summer, so that in the shade no one is incommoded by perspiration; they also soften the rig ors of winter, and produce such a moderation in the climate that the inhabitants can wear the same dress throughout the

The soil in the neighborhood of the sen-coast is of a brow color, inclining to red, and generally poor, being a mixture of clay and gravel. In the interior, and especially in the valleys of the Rocky Mauntains, the soil is generally blackish though sometimes vellow. It is frequently mixed with mar and marine substances, in a state of decomposition. This kind of soil extends to a considerable depth, as may be pered in the deep cuts made by ravine, and the beds of riv-The vegetation in these valleys is much more abundant locked up between rocky sierras, or scooped out from barren wastes, that population must extend itself, as it were, in veins nifications, if ever the regions beyond the mountain Trying's Astoria.

CHITTENDEN'S FOG-BELL .- This appears to us an excellent invention for averting danger to vessels during thick weather. The plan is briefly as follows:

A boat of about one ten buoyancy-about the si nee, having a high swelling and elliptical deck, and a attached near the forward end of the keel, by which it he moored wherever its services may be wanted. From the deck of this heat a quadrangular gallows is made of two round iren rods, of which each end of each is attached to the deck near the sides of the boat, while the centre pair rises to the hight of six feet or more above the deck. These two rods cross each other at right angles, in the centre A, which place they are connected together by a vertical rev which also supports a beli B, of ordinary construction, invention could be more perfect, with regard to simplicity to give warning of danger in bad weather, and as the to be rung by the motion of the boat, it will infallibly rin bandest in time of winds and storms. A dense for without any swell or motion of the sea, will seldom, if ever occur and even if it should, there could be no serious danger, in will not probably exceed 50 dollars; and as bells are so ceptible of a great variety of tones, the sounds may be read; agnised and distinguished, even when there are s

his for three reasons:

1st. Oxygen being the base of acids, renders the secretion of the mouth doubly acrid, and thus the destruction of the Teeth is

health is put in jeopardy.

3d. Galvanic action is produced, and by this, both the nerves and teeth suffer. These hints, if duly regarded, will lead to the following

3d. Galvanic action is produced, and of the following important practice:

let. No acids will ever be used for cleansing the Teeth. All tooth powders should contain a moderate aikali.

2d. All operators on the Teeth, who use mineral pastes or fasible metals, all of which are composed of metals having strong affinity for oxygen, should be shanned; their boasted remedies are far worse than the disease they promise to cure.

3d. All combinations of metals, such as Tin. Gold. Silver, Platina, &c., should be carefully avoided. The purest metals differ in affinity for exygen, and of course produce galvanic action when put together in the same mouth. Fine Gold is the only metal that should ever find a lotgmext in the human mouth, and to this conclusion every scientific Dentist must inevitably come.

No Dentist can consistently oppose the use of an amalgam of mercury and ailver, which he is himself in the habit—as is at present almost every Bentist in the Union—of using analgams of Platina. Gold, Silver, Copper and Zine, under the name of "Gold Flates." Fine Gold, and Fine Gold alone for Dental operations, must soon become an axious.

become an axious.

And now I will only add in conclusion, for the informati-And now I will only add in conclusion, for the information of all who wish to avoid the evil consequences of compound metals in the mouth, that they can be furnished with Teeth et to fine Gold Plates, unmixed and unadwherated, by calling at my Koom. No. 98 Broadway, Now-York, the only place, (with the exception of Brockway & Sovs, in Albany and Truy,) where Teeth are set to plates, without introducing into the mouth an amaigam of at least four metals, all differing materially in their affinity for oxygen.

One word to those who want entire, or nearly entire sets of Teeth, inserted on the atmospheric pressure or suction principle. My method of putting in suc ion Teeth, differing in once essential points from the manner usually adopted, I feel confident in saying, stands unsurpassed.

coin the manner usually adopted, I feel confident in saying, states insurpaised.

Gentlemen of the profession as well as those requiring professional ervices, are invited to call and examine my method of Setting Sectil, without the use of solder or any other base metal.

New York, July 31, 1844.

WM. HAGAR & CO.
TYPE AND STEREOTYPE FORNDRY,
74 Fulton, corner of Gold-street,

THE subscribers take this method of annouscing to their friends and the public generally that having purchased the extensive and well known Type Foundry formerly owed by Messes. Coaner & Cooke, they have removed the same to their present central location. Having made extensive revisions, alterations and additions, they are now prepared to execute orders of any magnitude they may be favored with, with promptness, and on as favorable terms as at any Foundry in America. To their new Specimen-Book, which has been retently extensively circulated, they would respectly refer.

All articles manufactured by them shall be of a material equal, if not superior, to any manufactured in this country—and undergo a thorough examination as to appearance, ranging, dressing, and properly assorting. All articles exhibited in the Specimen-Book formerly saued by Conner & Cooke, together with Sorts to Fonts sold by them, can naw be furnished from this Foundry without delay, with may since added.

MPORTANT AND USEFUL ENTERPRISE, by A. BASSFORD.—THE CLIMAN.—This is the name selected for the extensive room just completed in elegant and convenient style at No. 149 Fulton-street, extending through to Ann, in which it is instead to a convenient style at No. 149 Fulton-street, extending through to Ann, in which it is instead to a convenient style. at No. 149 Fulton-street, extending through to Ann, in which it's in-tended to supply the inhabitants and strangers in this great emportum with breakinsts, dinners and suppers, in the most fashionable manner and at reasonable prices. The whole establishment will be smore the immediate superintendence of the well known S. R. Holt, formerly proprietor of Holt's Hotel. It is designed to produce the richast defi-cacies, the best of provisions, the choicest figures, and superior cooks and waiters. As the rooms are spacious and arry, individuals, as also parties, may enjoy the comfort of having ample room, besides an op-portunity of perusual warry all the new-papers published in the Uni-ted States, and in many foreign countries. As them and are in the habit of obtaining their meals in eating-house, may they not be so-licited to flavor this establishment with a single call (as least) for the purpose of deciding for themselves whether or not the "Climax" de-serves patronage?

Serves patronage?

SARATOGA WATER, from the lodine Spring.—The IODINE SPRING contains much more lodine and Carbonate of
Magnesia than any other fountsin, consequently is the most powerful
alterative and aperican. It is bighly charged with Carbonic Gass

alterative and aperion. It is highly charged with Carbonic Gass which renders it a pungent and delig atril draik.

PECTORAL BIONES OF LAVERWORET.

PECTORAL BIONES OF LAVERWORET.

FOR Coughs, Colds, Astima, Whooping Cough, Shortness of Breath and all Affections of the Heart and Lungs, leading to CONSUMP TION. Reader, yes have tried many medicines for your cold. Have you had a bottle of NOWILL'S PECTORAL HONEY OF LIVER WORT? Try it. It is assuredly the best medicine ever offered to the nuble. The testimonials tendered and the high eulogiams given this last winter from those who have taken it, attest at once its superior virtue. It is from this cause that we are induced to make it as popular as possible, though it has increasingly recuived the public approbation amounting to about 56th thousand bottles per numm. No puffor advertisement has done this to hoax on the sufferer a watery colored solution, and inefficacious medicine, thereby hastening a disease to the fatal termination—the puff alone sustaining the hopes of the patient, until hopes are gone.

The preparation of the Honey of Liverwort is solely composed of vegetable ingredients simple in their nature, but in combination not only calculated to remove the immediate disease, but to invigorate the system generally. No medicine ever offered to the public can be said to have reacored to health so great a number of persons in consumptive complaints as Newfill's Pectoral Honey of Liverwort. It should be kept in all families, to administer upon the first symptom of cold ocough, as inattention and neglect are the causes of numbers losing their lives, especially in consumptive causes.

This medicine, offered to the public at the low price of Two Shillings, is accessible to all. For sale wholesale and retail at the principal Depot, 64 Madison, cor. Catherine-st; H. V. Bush, 61 Barelay-sit, J. R. Hobbard, Bowery; W. H. Milnor, 192 Broadway, Dr. James H. Hart, 278 Broadway, corner of Chamber-st; D. C. Mitchell, 60 Church st. New-Havel; and retailed by one in every principal city in the Duble of America are informed, that the British College of Health,

Union.

JEPORTANT NOTIGE—Morison's Pills.—The Public of America are informed, that the British College of Health, Londos, have disminsed Mr. Taylor, of 94. Broadway, New-York, as their General Agent, and that now, therefore, they have no longer a general agent in America. This is particularly impressed on the people of the United States, as it is well known that several individuals are endcayoring to palm off their Medicines under the plea that they are noting as General Agents to the Establishment in London.

Merchants, Traders, Agents and others, may be supplied on the same terms as their late agent, Mr. Taylor, by sending their orders direct to Messrs, MORISON, at the British College of Health, Hamilton Place, New Road, London, when they will obtain at the same time a Certificate of the genuineness of the Medicines.

Look for the revocation of Mr. Taylor's appointment and other particulars, in the New-York and other papers. All debts owing to Mr.

in the New-York and other papers. All debts owing to Mr. or Morison's Medicines, are to be paid to Messrs. FIRTH & Taylor for Morison's Medicines, are York, HALL, of Franklin Square, New York, MORISON, MOAT & CO.

PHALON'S CELEBRATED ANTI-DANDRIFF.

CELEBRATED ANTI-DANDRIFF.

NO ONE should be without a bottle of Phalon's Anti-Dandriff—it is without exception the best remedy ever yet employed for utterly eradicating with one wash, the dandriff completely from the head. The proprietor of this celebrated Wash, unlike some individuals, will not guarantee that it will turn gray Ziri black or make hald heads hairy, but he will give \$100 to that person who will say that it is not the article he recommends it to bu, viz: a thorough cleaner of the surface and Halfk of the head. Its qualities are peculiar. It not only cleanese and purifies the Hair, but leaves a glossy and silky appearance unlike all other remedies of the sort ever yet offered to Public. It leaves, after its application, the most exhiberating and coshing sensation, and its effect for LADIES and CHILDREN'S heads is unrivaled. Geatlamen will find this compound a great preventive to Baldness, for by keeping the roots of the Hair and pores of the head perfectly free from chadriff, it promotes and strengthens the growth of the Hair. All persons travelling South, or hving in a warm climate, should never be without it as its qualities for a Southern climate are altogether integuilled. Those who may be sceptical as to the qualities of my invaluable Wash I here invite to purchase one bottle, and if not found to be exactly as I warra it to be, I will return them the cash if used according to direction.

Price 50 and 75 cents per bottle, or gentlemen can have it applied for 25 cents, and to be purchased of any barber in New-York. Observe, none is genuine unless signed by me in tink.
